DETAILED ACTION

Claims 7 and 10-12 have been cancelled. Claims 1-6, 8, 9 and 13 are pending in this application.

The examiners Amendment is withdrawn because the claims are found to be not allowable.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6, 8, 9 and 13 are rejected under 35 U.S.C. 102 (a) as being anticipated by Daum et al., US 5,057,144.

Daum et al., teach sulphonylaminocarbonyl triazolinones that read in the instant claims when **R**¹ is H, **A** represents a single bond, **R**² is optionally substituted alkyl, alkylthio, **R**³ is triazolinone, **n** is 0 or 2, **R**⁴ is H, hydroxyl, amino, cyano, alkoxy, alkylamino, dialkylamino, C₃.

Art Unit: 1626

C₆ cycloalkyl, R⁵ is H, hydroxyl, mercapto, amino, C, cyano, alkoxy, alkylamino, dialkylamino, C₁-C₄ alkyl and Q is O. See abstract and columns 9, 13, and 17.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a), which forms the basis for all obviousness rejections, set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Daum et al., US 5,057,144.

Applicants claim substituted amino(thio)carbonyl compounds having generic formula shown in claim 1, wherein R¹ is H, A represents a single bond, R² is optionally substituted alkyl, alkylthio, R³ is triazolinone, n is 0 or 2, R⁴ is H, hydroxyl, amino, cyano, alkoxy, alkylamino, dialkylamino, C₃-C₆ cycloalkyl, R⁵ is H, hydroxyl, mercapto, amino, C, cyano, alkoxy, alkylamino, dialkylamino, C₁-C₄ alkyl and Q is O.

Determination of the scope and content of the prior art (MPEP §2141.01)

Daum et al., teach sulphonylaminocarbonyl triazolinones that are analogs of the instant compounds wherein R² is optionally substituted alkyl.

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The only difference between the compounds of Daum et al., and the claimed compounds is that applicants are claiming alkyl instead of hydrogen at positions R².

Finding of prima facie obviousness--rational and motivation (MPEP §2142-2413)

However, alkyl and H are art recognized equivalents. In re Wood, 199 U.S.P.Q. 137 (C.C.P.A. 1978) and In re Lohr, 137 U.S.P.Q. 548, 549 (C.C.P.A. 1963). Therefore, it would have been prima facie obvious to one having ordinary skill in the art at the time the invention was made to substitute alkyl for H, in the compounds of Daum et al. The motivation to make the claimed compounds derives from the expectation that structurally similar compounds are generally expected to have similar biological and chemical properties. In re Gyurik, 596 F. 2d 1012, 201 USPQ 552 (CCPA 1979).
